

PIB Risk Management Training Courses 2021

PIB Risk Management is a leading provider of Health and Safety training.

Who are we?

We are accredited by a number of awarding bodies including the Construction Industry Training Board (CITB), the Institution of Occupational Safety and Health (IOSH), QualSafe, the Regulated Qualification Framework (RQF), the Royal Society for the Prevention of Accidents (RoSPA) and UK Asbestos Training Association (UKATA). You can be sure you are dealing with experts.

Our training services

Our team of specialist trainers offer a range of practical courses, including accredited and bespoke solutions that help keep your employees safe at work. We combine practical experience, our extensive training skills and a wealth of industry knowledge to design, develop and deliver training courses that reflect your specific requirements.

We run our courses from dedicated training centres in London, York, Retford, Halifax, Preston and Hemel Hempstead, or we can come to you. We're also able to use most third-party venues, such as hotels and conference centres. As well as this, we design and develop e-learning courses and bespoke training videos, so your employees can learn from the comfort of their own business environment.

Why do your employees need training?

Each year over 30 million working days are lost due to work-related illness and work place injury. We believe that effective training will contribute to making your employees competent in health and safety. The Health and Safety at Work etc Act 1974 requires you to provide whatever information, instruction, training and supervision as is necessary to ensure, so far as is reasonably practicable, the health and safety at work of your employees.

We believe strongly in coaching and mentoring our clients, so they understand the risks and the risk solutions that we're presenting to them. Clients can take comfort knowing that their moral, legal and financial obligations are being looked after.

**Kevin Barrett,
Operations Director**
