

Training Solutions

Management of Contractors Training

Who Is This Course Designed For?

This course is designed to inform staff of the need to ensure the safety and health of both the company and contractor personnel when work is to be undertaken within company's operational areas.

The course explores how, using collaboration and good communication, Occupational Health and Safety risks to both parties can be prevented. We look at the legal and commercial imperatives required and how using the clients Safety Management Systems and Procedures benefits are gained by all those involved.

Interactive sessions throughout the course will ensure clarity for all levels of attendees

About the Course

- > Duration: 1 day
- > This event is suitable for 10-15 delegates
- > Refresher training recommended every 3 years

What Do I Do Next?

If you would like a course exclusively run for your employees, at your business premises, we would be happy to arrange this for you. Prices for a closed course are available on application.

Please call **01777 861861** or email our training department at sales@pibrm.com to discuss further or book a place on one of our open courses.

What Is Covered?

- > Introduction to how business and health and safety risk are integrated.
- > Contractor supply chain management (client process).
- > Defining different types of contractor relationships and their impact on client operations.
- > Shared problems and practical solutions for all contractual parties.
- > Contractor management (the clients procedures).
- > Contractor management and CDM requirements.
- > The importance of good communication and how to ensure standards are maintained.

This interactive course is often taught using the client's existing procedures and templates to help prepare and familiarise the delegates for real life situations. Multiple choice retention question set.
