Noise Awareness Training

Who Is This Course Designed For?

Damage to hearing is permanent and irreversible and can be very debilitating for the sufferer. High levels of noise at work can seriously affect people's general health and safety and their overall wellbeing.

Therefore, it is of the utmost importance that noise levels and people's exposure to noise at work are kept to an absolute minimum. This noise awareness course is designed to familiarise you with the risks posed by noise and help employers and employees alike keep noise emissions as low as they possibly can.

The course looks at the risks posed by noise to hearing, general wellbeing, and workplace safety and will provide information on legislation and employer and employee responsibilities. It will teach you how to carry out a risk assessment and how you can utilise your findings to implement control measures and prevent employees from harm.

About the Course

- > Duration: Half day
- > Format: Face-to-Face or remote online learning
- > Refresher training recommended every 3 years

What Do I Do Next?

If you would like a course exclusively run for your employees, at your business premises, we would be happy to arrange this for you. Prices for a closed course are available on application.

Please call **01777 861861** or email our training department at sales@pibrm.com to discuss further or book a place on one of our open courses.
